

Tathagat Verma

Master's in Computer Science at Stanford University

🌐 tathagatv.github.io | **in** [tathagatv](#) | **tw** [verma_tathagat](#) | **g** [tathagatv](#) | **✉** tathagatswagverma@gmail.com

EDUCATION

Stanford University, Stanford, USA Sep 2022 - May 2024 (expected)
Master of Science in Computer Science, Specialization - Artificial Intelligence GPA - **3.97/4**

Indian Institute of Technology Bombay, Mumbai, India Jul 2018 - Dec 2021
Bachelor of Technology in Computer Science and Engineering with Honors CPI - **9.64/10**

SCHOLASTIC ACHIEVEMENTS

- Secured **All India Rank 53** in **JEE Advanced** out of 200,000 candidates 2018
- Secured **All India Rank 34** in **JEE Main** out of 1.2 million candidates 2018
- **Clear Ventures Deeptech Fellow**: 6-month program connecting researchers and company builders 2023
- Recipient of the **Quadeye Excellence Scholarship**, awarded on the basis of academic achievements 2021
- Amongst top **30** in India selected for the **International Astronomy Olympiad Selection Camp** 2018
- Amongst top **35** in India selected for the **International Mathematical Olympiad Training Camp** 2017
- Awarded **Advanced Performer (AP)** grade in **3** courses for exceptional performance 2018-21
- Amongst top 300 students selected for the **Indian National Physics and Chemistry Olympiads** 2018
- Recipient of the **Kishore Vaigyanik Protsahan Yojana (KVPY)** fellowship by **Govt. of India** 2017

PUBLICATIONS

1. Title: **VarScene: A Deep Generative Model for Realistic Scene Graph Synthesis** [\[paper\]](#)
Authors: **Tathagat Verma**, *Abir De*, *Yateesh Agrawal*, *Vishwa Vinay*, *Soumen Chakrabarti*
Conference: International Conference on Machine Learning (ICML) 2022

RESEARCH EXPERIENCE

Object Importance Classification and Natural Language Explanation Generation Autumn 2022
Guides: *Prof. Mykel Kochenderfer*, *Jiachen Li* | *Research Assistantship* SISL, Stanford University

- Developed a deep learning model for importance classification and explanation generation in autonomous driving
- Utilized **CNN**, **Graph Neural Networks** and **attention** based **GRU** for image feature extraction, learning inter-object relationships and natural language generation respectively for the joint task in **PyTorch**

VarScene: A Deep Generative Model for Realistic Scene Graph Synthesis Autumn 2021
Guides: *Prof. Soumen Chakrabarti*, *Prof. Abir De* | *R&D Project* InfoLab, IIT Bombay

- Developed a deep generative model for novel scene graph synthesis using **VAE** and **Graph Neural Networks**
- Designed a goal oriented decoder for minimizing the maximum mean discrepancy between graph distributions
- Developed code in **PyTorch** and used the Visual Genome and Visual Relationship Detection datasets
- Significantly outperformed baselines on the Fréchet Inception Distances (**FID**), Inception Scores (**IS**) and achieved better results on the Shortest Path, Weisfeller Lehman and Neighborhood Subgraph Pairwise Distance kernels

Deep Learning for Medical Image Quality Enhancement Spring 2021, Autumn 2021
Guide: *Prof. Suyash Awate* | *R&D Project, Bachelor's Thesis Project* IIT Bombay

- Enhanced the quality of MRI images with sub-sampling and Gaussian noise in the frequency domain and PET images with Poisson noise in the sinogram domain under the weakly-supervised regime
- Trained models using the **RED-CNN** and **UNet** architectures with Bayesian learning in **PyTorch**
- Utilized intermediate VGG-16 layers for **style based losses** and Fourier and Wavelet transform loss functions

INTERNSHIPS

Bad Label Detection Summer 2023
Scale AI | *Machine Learning Research Engineer Intern* San Francisco, USA

- Developed a bad label detection framework to identify mislabeled data points for relabeling
- Proposed a data labeling pipeline for an IG Reel Genre Classification task using bad label detection
- Finetuned **multimodal video classification models** for bad label detection, getting **6%** labeling cost reduction

Student Venture Partner Summer 2022
Venture Highway LLP | Guides: *Aviral Bhatnagar*, *Akul Jindal* Bengaluru, India

- Gained exposure to sourcing and evaluating **seed stage startups** and interacted with many founders

Image Functionality in the Whiteboard Android Application Summer 2021
Microsoft India (R&D) Pvt. Ltd. | Software Engineer Intern Noida, India

- Integrated **Microsoft Lens SDK** into Whiteboard Android, to support image and OCR tools provided by Lens
- Worked in **Java Android** backend, building the bridge to send images from native Android to the web application
- Developed code in **React** for the web application, making the UI component for triggering image workflow

Attribute Value Extraction from Product Descriptions Summer 2020
Coupa Software India Pvt. Ltd. | Data Science Intern Pune, India

- Developed unsupervised and semi-supervised methods for extracting attribute values from product descriptions
- Implemented an **RNN** model for sequence tagging using **CRF**, **BiLSTM** and attention mechanisms
- Optimized hyper parameters using **Bayesian Optimization**, reducing time required for tuning the model
- Automated taxonomy creation by clustering on co-occurrence graphs using the **Chinese Whispers Algorithm**

Business Monitoring and Alerting Systems Summer 2019
Delta Exchange | Software Engineer Intern Mumbai, India

- Made real time predictions for prices of multiple Crypto Derivative contracts by implementing ARIMA model
- Developed a dashboard using **Django** to monitor Business Performances, now being used on a daily basis
- Used **MySQL** database along with APIs and **WebSockets** of various exchanges for obtaining real time data

TECHNICAL PROJECTS

Mitigating Scams and Catfishing on Dating Apps through Automatic Moderation Spring 2023
Guide: Alex Stamos | Trust and Safety Engineering | Demo Course Project

- Developed a **Discord bot** to mitigate scams and catfishing on a dating app simulation on Discord
- Built user-reporting and moderation workflows to handle multiple types of offences in different scenarios
- Leveraged **regex**, **image-captioning** and **GPT-3.5** to handle automated flagging and prevent adversarial cases

Blockchain Simulation and Applications Autumn 2021
Guide: Prof. Vinay Ribeiro | Blockchains, Cryptocurrencies and Smart Contracts Course Project

- Implemented a peer-to-peer cryptocurrency network simulation in **C++** following the **Bitcoin** protocols
- Simulated selfish and stubborn mining attacks, analyzing the effects of hash power and network connectivity
- Developed a decentralized payment application on top of **Ethereum** in Solidity, utilizing smart contracts

Foreshadow Attack and its Variants Spring 2021
Guide: Prof. Bernard Menezes | Advanced Network Security and Cryptography Course Project

- Studied the **Foreshadow** attack and its impact on **Intel SGX** and **VM** systems due to speculative execution
- Simulated the proof-of-concept attack on **Linux** kernel with **x86** processor in the absence of Intel TSX

Route Optimization Algorithm Winter 2019
Inter IIT Technical Meet IIT Roorkee

- Proposed solution for the Vehicle Scheduling Problem in the setting of buses, winning **gold** medal among 20 teams
- Reduced the problem to multiple instances of the Travelling Salesman Problem(**TSP**) using *k*-means clustering
- Generated routes while taking real time traffic into account using **Google Maps APIs** in Python

TECHNICAL SKILLS

Programming	C++, Python, C, Java, Bash, Solidity, Racket, SQL, MATLAB
Packages	PyTorch, TensorFlow, Keras, NLTK, SciPy, Pandas, Statsmodels, NumPy
Software	Git, L ^A T _E X, AutoCAD, SOLIDWORKS, Android Studio
Web Development	HTML, CSS, JavaScript, Django, Bootstrap

LEADERSHIP POSITIONS

Stanford Swing Dancers Organizer Sep 2023 - Jun 2024
Stanford University

- Organizing weekly Lindy Hop dance lessons and social dancing for students. Getting a footfall of 25 every week.

Institute Student Mentor Jun 2021 - Jun 2022
Student Mentorship Program IIT Bombay

- Mentoring **12 freshmen**, helping them adjust to the institute environment, focusing on their holistic development
- Amongst 130 out of over 300 applicants selected through a rigorous procedure of interviews and peer reviews

Senior Department Academic Mentor

Jun 2020 - May 2022

Computer Science and Engineering Department

IIT Bombay

- Mentoring **6 sophomores** of CSE department to assist them in navigating department specific curriculum
- Working in a supportive, facilitative and developmental role for the student community in general as a mentor

Teaching Assistant

- **Machine Programming** | *CS 329M* Stanford University, Sep 2023 - Dec 2023
- **Design and Analysis of Algorithms** | *CS 161* Stanford University, Apr 2023 - Jun 2023
- **Natural Language Processing with Deep Learning** | *CS 224n* Stanford University, Jan 2023 - Mar 2023
- **Artificial Intelligence and Machine Learning** | *Prof. Ganesh R* IIT Bombay, Jul 2021 - Nov 2021
- **Data Structures and Algorithms** | *Prof. Sharat C* IIT Bombay, Jan 2021 - May 2021
- **Logic for Computer Science** | *Prof. Krishna S* IIT Bombay, Jul 2020 - Nov 2020

Responsible for conducting doubt sessions, preparing problem sets, programming labs and grading examinations

Organiser in Corporate Relations

Nov 2018 - Mar 2019

Entrepreneurship Cell

IIT Bombay

- Responsible for speaker handling and handling overall logistics in multiple events
- Part of the execution team for **The Panel Discussion** at Entrepreneurship Summit, 2019

OTHER PROJECTS

E-Commerce Recommender System

Spring 2021

Guide: *Prof. Umesh Bellur* | *Database Management*

Course Project

- Built an E-Commerce recommendation website using **Neo4j** graph database and **Node.js** runtime environment
- Included the features of user history, trending products and text similarity metrics to generate recommendations

Compiler for C-like Language

Spring 2021

Guide: *Prof. Uday Khedker* | *Implementation of Programming Languages*

Course Project

- Built compiler for a C-like language, constructing Three Address Code and Register Transfer Language incrementally
- Implemented the scanner in **lex**, parser in **yacc** and conversion of abstract syntax tree to TAC and RTL in C++

Portal for Selecting and Evaluating Teaching Assistants

Autumn 2019

Undergraduate Academic Council

IIT Bombay

- Revamped the selection portal for Teaching Assistants being used in the Institute by faculty and students
- Developed a **full-stack** application with backend in Django, MySQL DB and frontend with HTML and JavaScript

Splitwise Clone Web Application

Autumn 2019

Guide: *Prof. Amitabha Sanyal* | *Software Systems Lab*

Course Project

- Built a **Django** web app to automate addition and splitting of bills among stakeholders, similar to **Splitwise App**
- Designed a database in **MySQL** for efficiently implementing features like settling up expenses from all groups
- Provided statistical insights on the type of expenditures made by users, using **JavaScript** and **Highcharts**

EXTRACURRICULAR

- Won **gold** medal in Route Optimization Competition at the **Inter IIT Technical Meet, IIT Roorkee 2019**
- Represented IIT Bombay at the **34th Inter IIT Aquatics Meet, IIT Guwahati 2018**
- Awarded **second** position in **CoDecode** (coding competition) organized by Techfest, IIT Bombay 2020
- Covered a distance of **23.2 km** swimming continuously for **12 hours** at Swimathon, IIT Bombay 2019
- Awarded Certificate of Merit for **winning** the Inter Department Football Tournament IIT Bombay 2019
- Awarded Diploma Certificate for competing in the **Gothia Football Cup, Gothenburg, Sweden 2011**
- Completed 2 levels of graded examination in communication skills from **Trinity College London 2013**
- Phonathon: Pitched to 50 alumni the events conducted by Student Alumni Relations Cell, IIT Bombay 2019
